

FOR IMMEDIATE RELEASE

Becker County Launches Heartland Trail Routing Study: Public Input Needed

Becker County, MN - Becker County is conducting a routing study for the Heartland Trail, focusing on the area from Dunton Locks County Park to Bucks Mill. The purpose of this study is to evaluate possible corridor routes for the trail extension and gather valuable input from residents, visitors, stakeholders, and trail users.

Community feedback is essential to ensure the trail best serves the needs and interests of the public. Residents are encouraged to visit the project website to learn more about the study and participate in the planning process. An interactive map is available on the site, allowing users to leave comment pins and share their thoughts on potential trail routes.

Becker County values public involvement and invites everyone interested in the future of the Heartland Trail to contribute their ideas and concerns. The feedback collected will help guide decisions and support a trail design that benefits the entire community. For those who prefer in-person engagement, an open house will be held at the end of August to provide another opportunity for community input.

For more information and to provide input, please visit the project website and add your comments to the interactive map.
